

Dynamic Engineering solutions

The best specialized Engineering firm providing a wide range of project management for industries.

About Us

Objectives

We are Electro-mechanical provider and service company who can serve and support your team technically with a very high level of engineering thought using innovation, creativity and a wealth of knowledge.

We are committed to standard technical installations and design in all we do.

Capabilities

-

Dynamic's team

- We are a partner who knows how to support, select and supply tailor-made materials or equipment which can be under our target scope with all the necessary services.
- We have always aspired to excellence through quality, innovation and service.
- Today, we are able to work together with our customers to obtain the best service results in terms of quality, efficiency and flexibility.

Purpose, Mission and Vision

Purpose

To create and apply a high productive organizations by the most reliable and professional supportive technical team.

Mission

Combine technical requirement with work standard, services, quality and safety goals with competitive prices to provide the best result

Vision

Playing as one agile family team to get the highest productivity with a very safe environment

Clients

Scope of work

-

Scope of work

Turn key Electro-Mechanical projects

- Mechanical and pipe line fabrication.
- Production line designs and installations.
- Utilities design and installation.
- Industrial trouble shooting solving.

Supplying material

- Equipment which support and serve FMCG.
- Select the right equipment.
- Service materials and component.

Energy optimization

- Improve sites energy consumption.
- Find areas of saving.
- Solve all energy topics

Turn-key Electro-mechanical projects

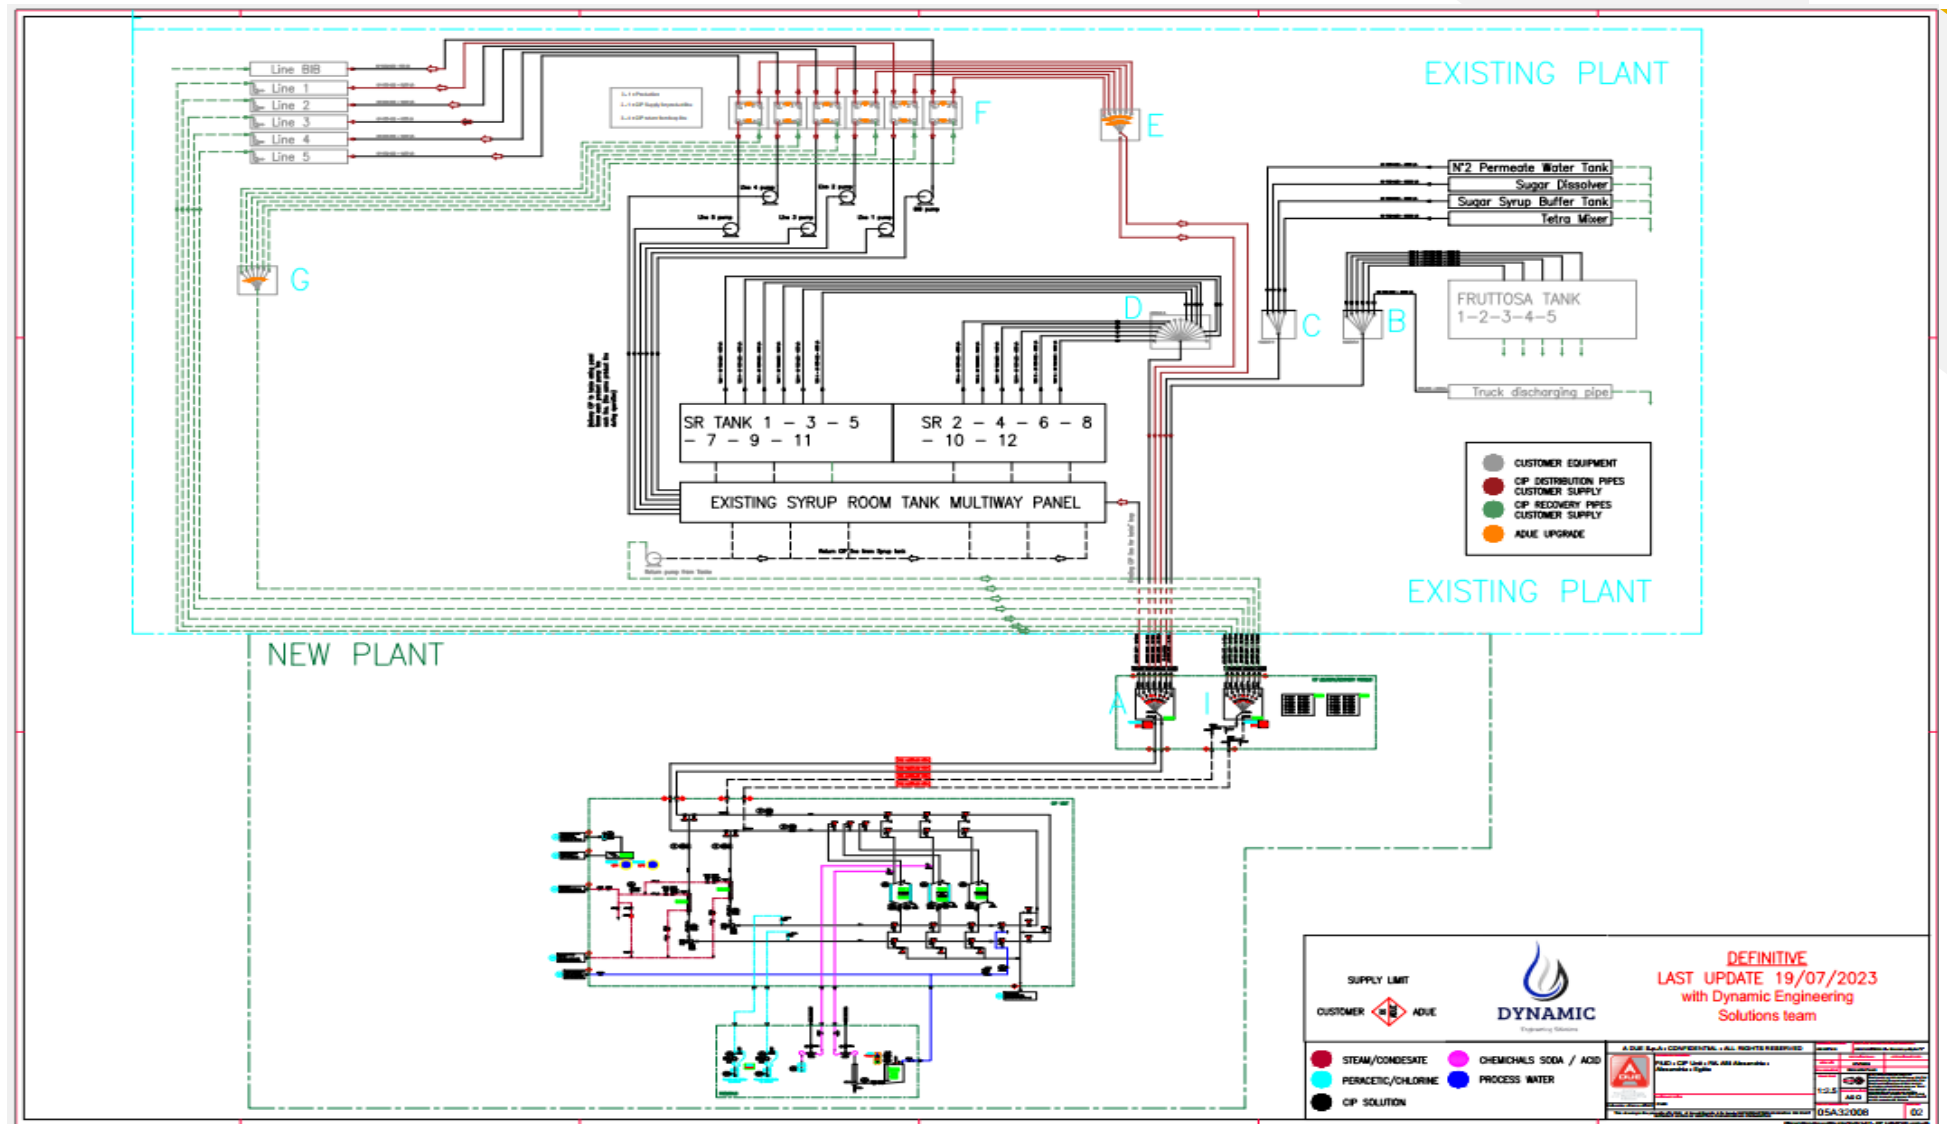

- We have well-known experience in coordinating turnkey projects from a standard technical perspective and project management. preparing, designing, and installing the production lines with all needed pipelines which can serve FMCG industries in a very high standard of quality.
- Locating or re-allocating the equipment based on the P&ID.
- Designing the production area based on the capabilities.
- Piping and instrumentation diagram (P&ID) which shows the interconnection of process equipment and the instrumentation used to control the process.
- Product pipeline fabrication by providing high-quality Argon injection welding service with a very high competitive cost of fabrication.
- Utilities pipelines design and installations (Steam – Air – Water).

Turn-key Electro-mechanical projects

Design and P&ID of the plants

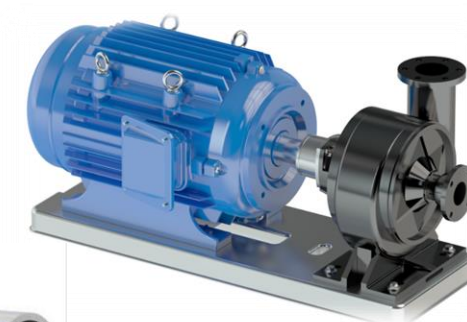

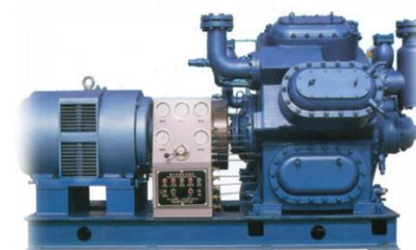

Turn-key Electro-mechanical projects

Supplying materials.

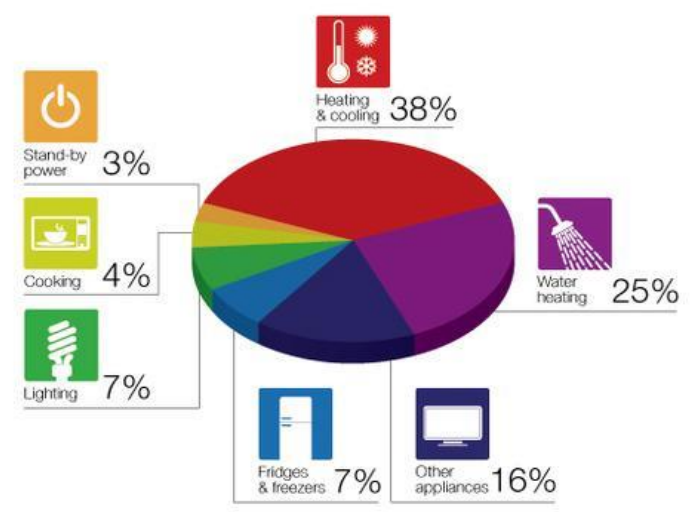

We are playing as a good well supplier how can support in selecting the right equipment or material which can cover your purpose.

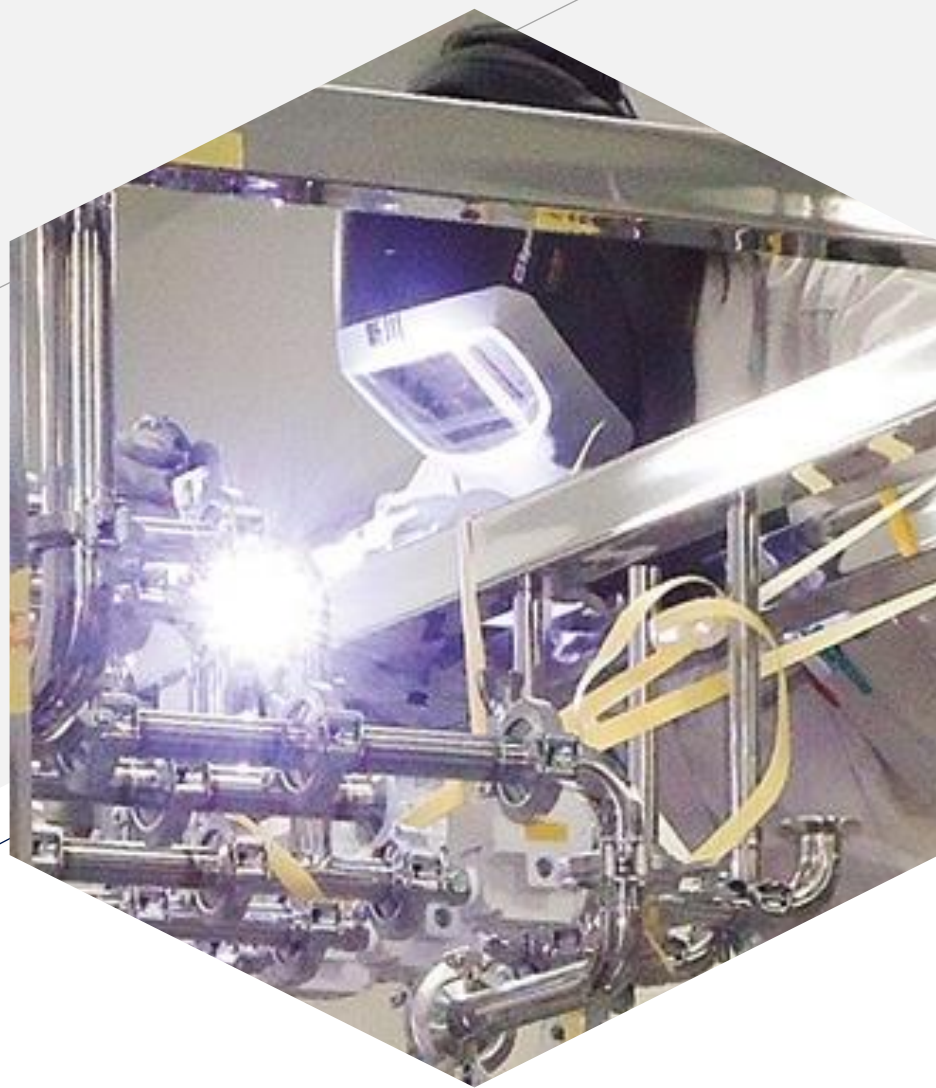

Quality, Engineering knowledge are our way of work.

Energy Optimization

Optimize your energy usage, meet sustainability targets, and reduce costs through in-depth monitoring of energy data. Gain insights into how much energy the operation consumes on an hourly, daily, monthly or yearly bases.

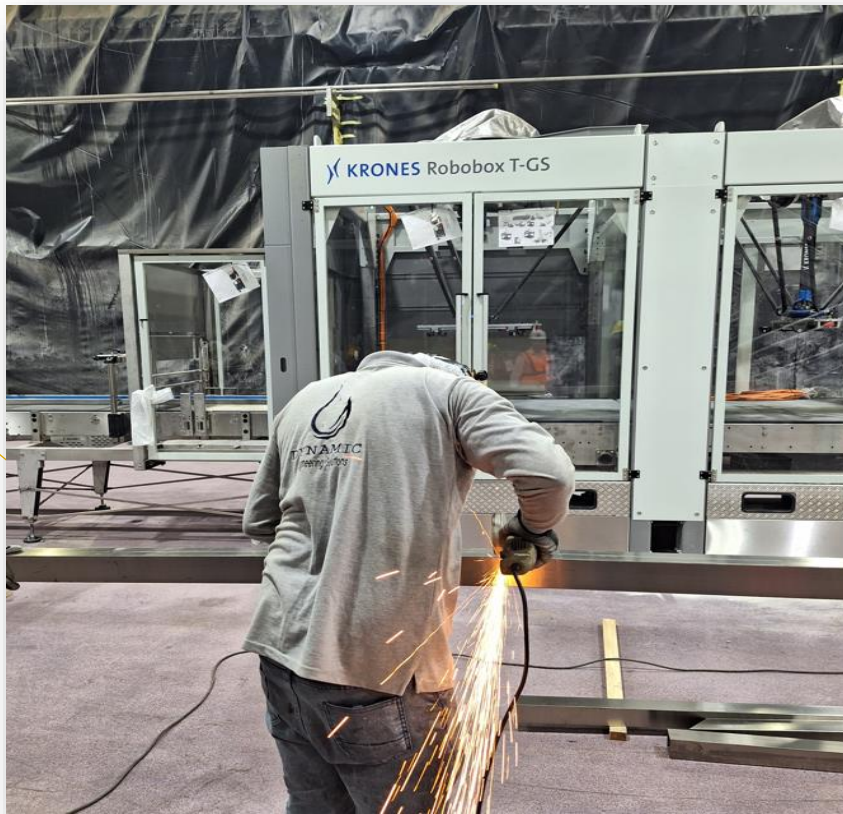

Success stories

-

Success stories from our projects

Pipeline design and installations for new CAN line from Kronos

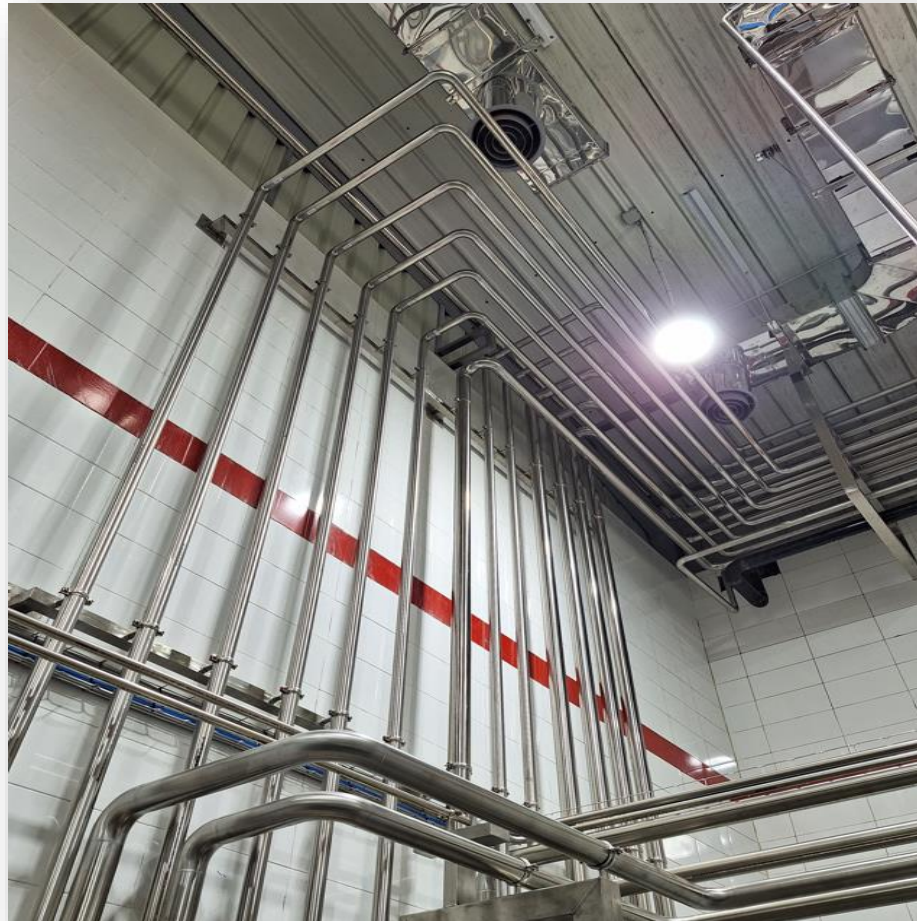

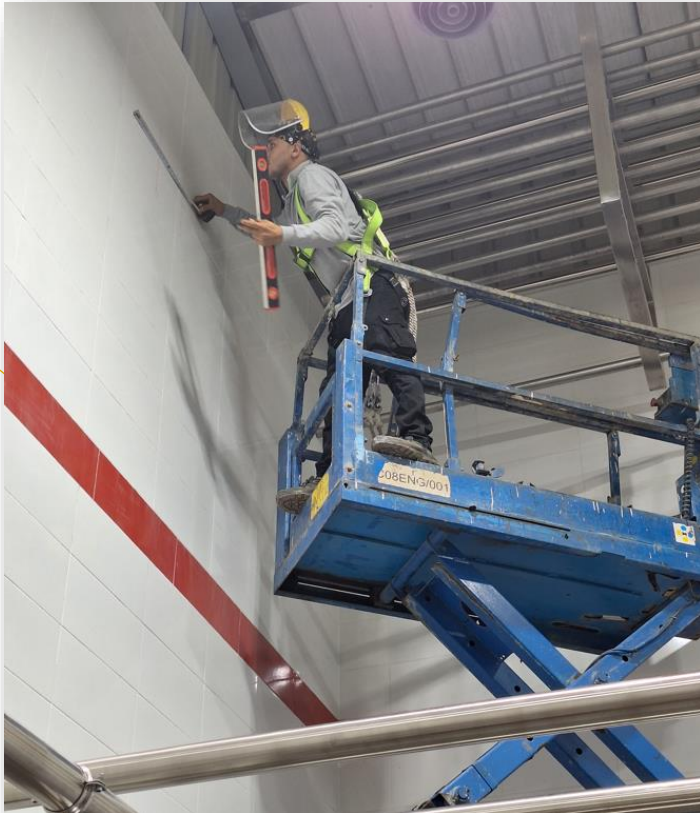

Success stories from our projects

Pipeline design and installations for new CAN line from Krones

Success stories from our projects

Pipeline design and installations for CIP unit from Krones

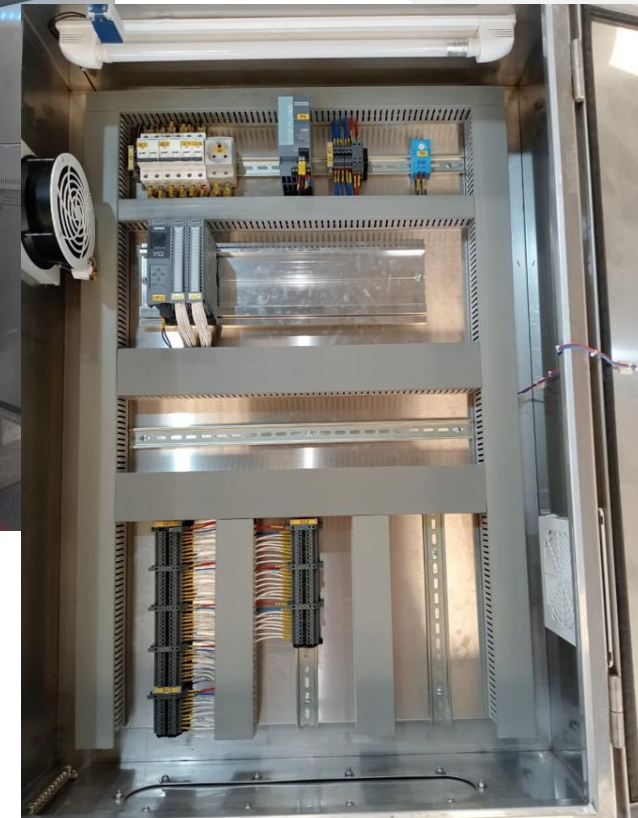

Success stories from our projects

Pipeline design and installations for CIP unit from ADUE in Coca ABI

Success stories from our projects

Pipeline design and installations for CIP unit from ADUE in Coca ABI

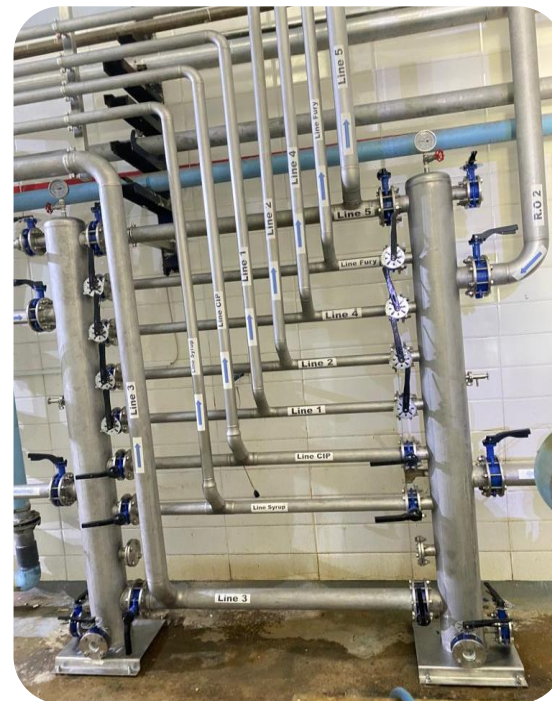

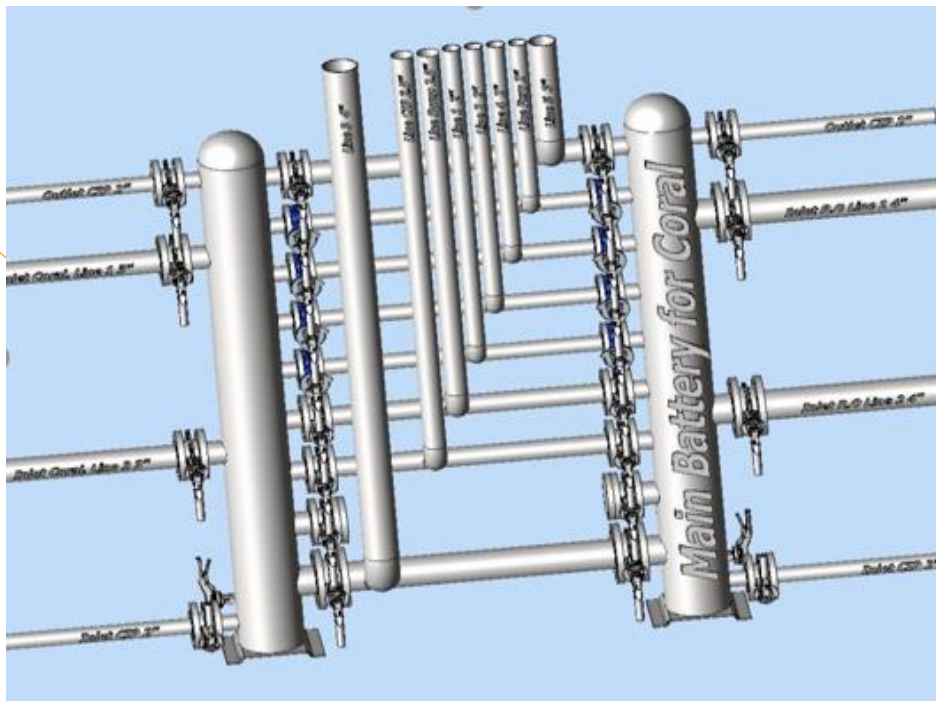

Success stories from our projects

PET line installations – KRONES line

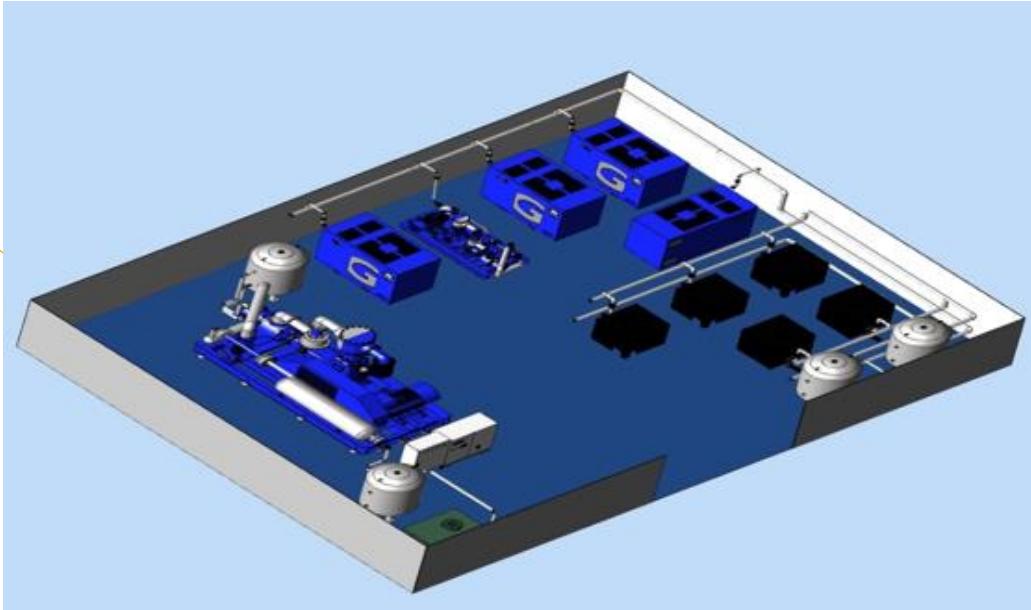

Success stories from our projects

Water distribution battery

Success stories from our projects

Utilities room re-allocation with pipe line fabrication and commissioning

Success stories from our projects

Re-allocating Ammonia chiller with installations and commissioning with the plant

Success stories from our projects

Supply Syrup tanks with connections to syrup network

Success stories from our projects

Installing a compressed air system with an exhaust duct

Success stories from our projects

Relocating Re-allocating some equipment

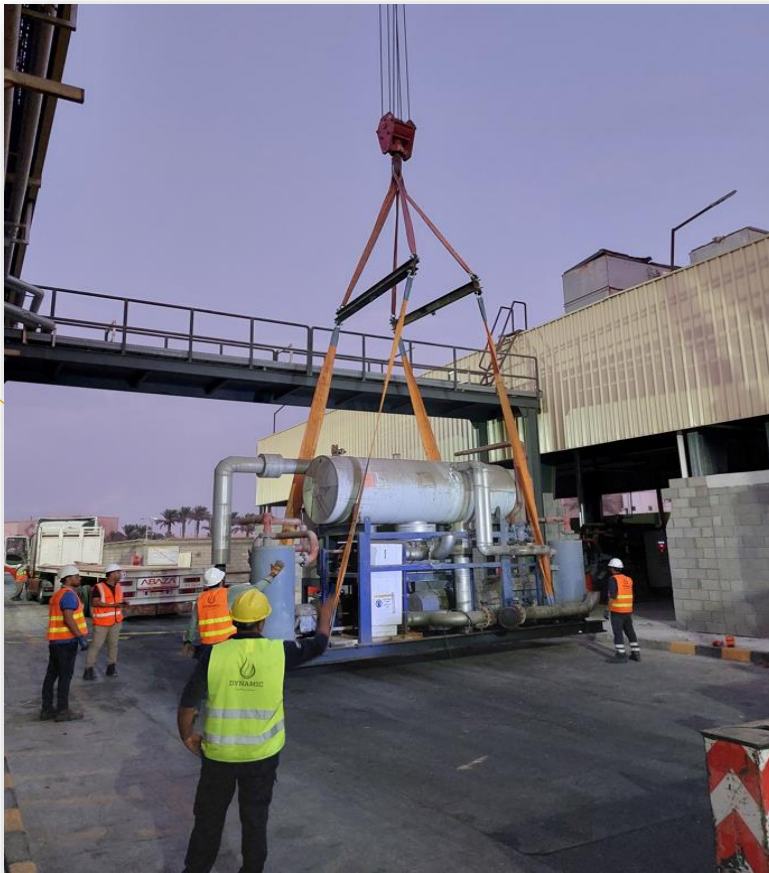

Success stories from our projects

Relocating Ammonia chiller with installation and commissioning

Success stories from our projects

Relocating Ammonia chiller with installation and commissioning

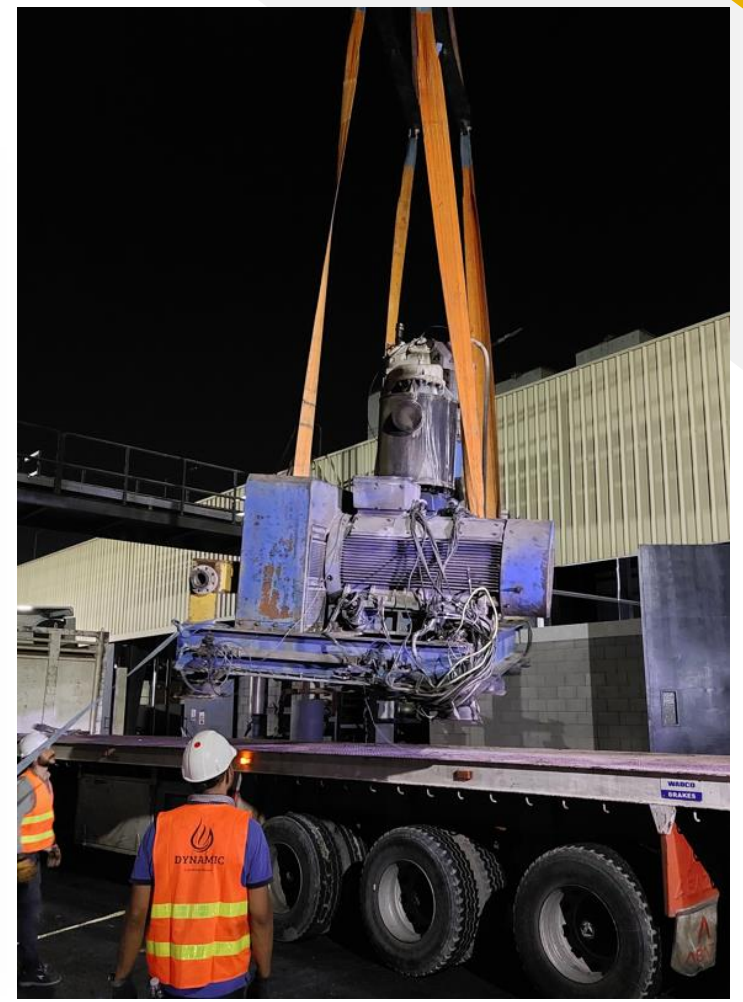

Success stories from our projects

Supplying and fabricating new syrup dissolving unit

Success stories from our projects

Relocating and installing high pressure compressor with commissioning

Success stories from our projects

Installing compressed air system with exhaust duct

Success stories from our projects

Pipeline design and installations for CIP unit from ADUE in Coca Assiut

Success stories from our projects

Pipeline design and installations for CIP unit from ADUE in Coca Assiut

Success stories from our projects

Pipeline design and installations for CIP unit from ADUE in Coca Assiut

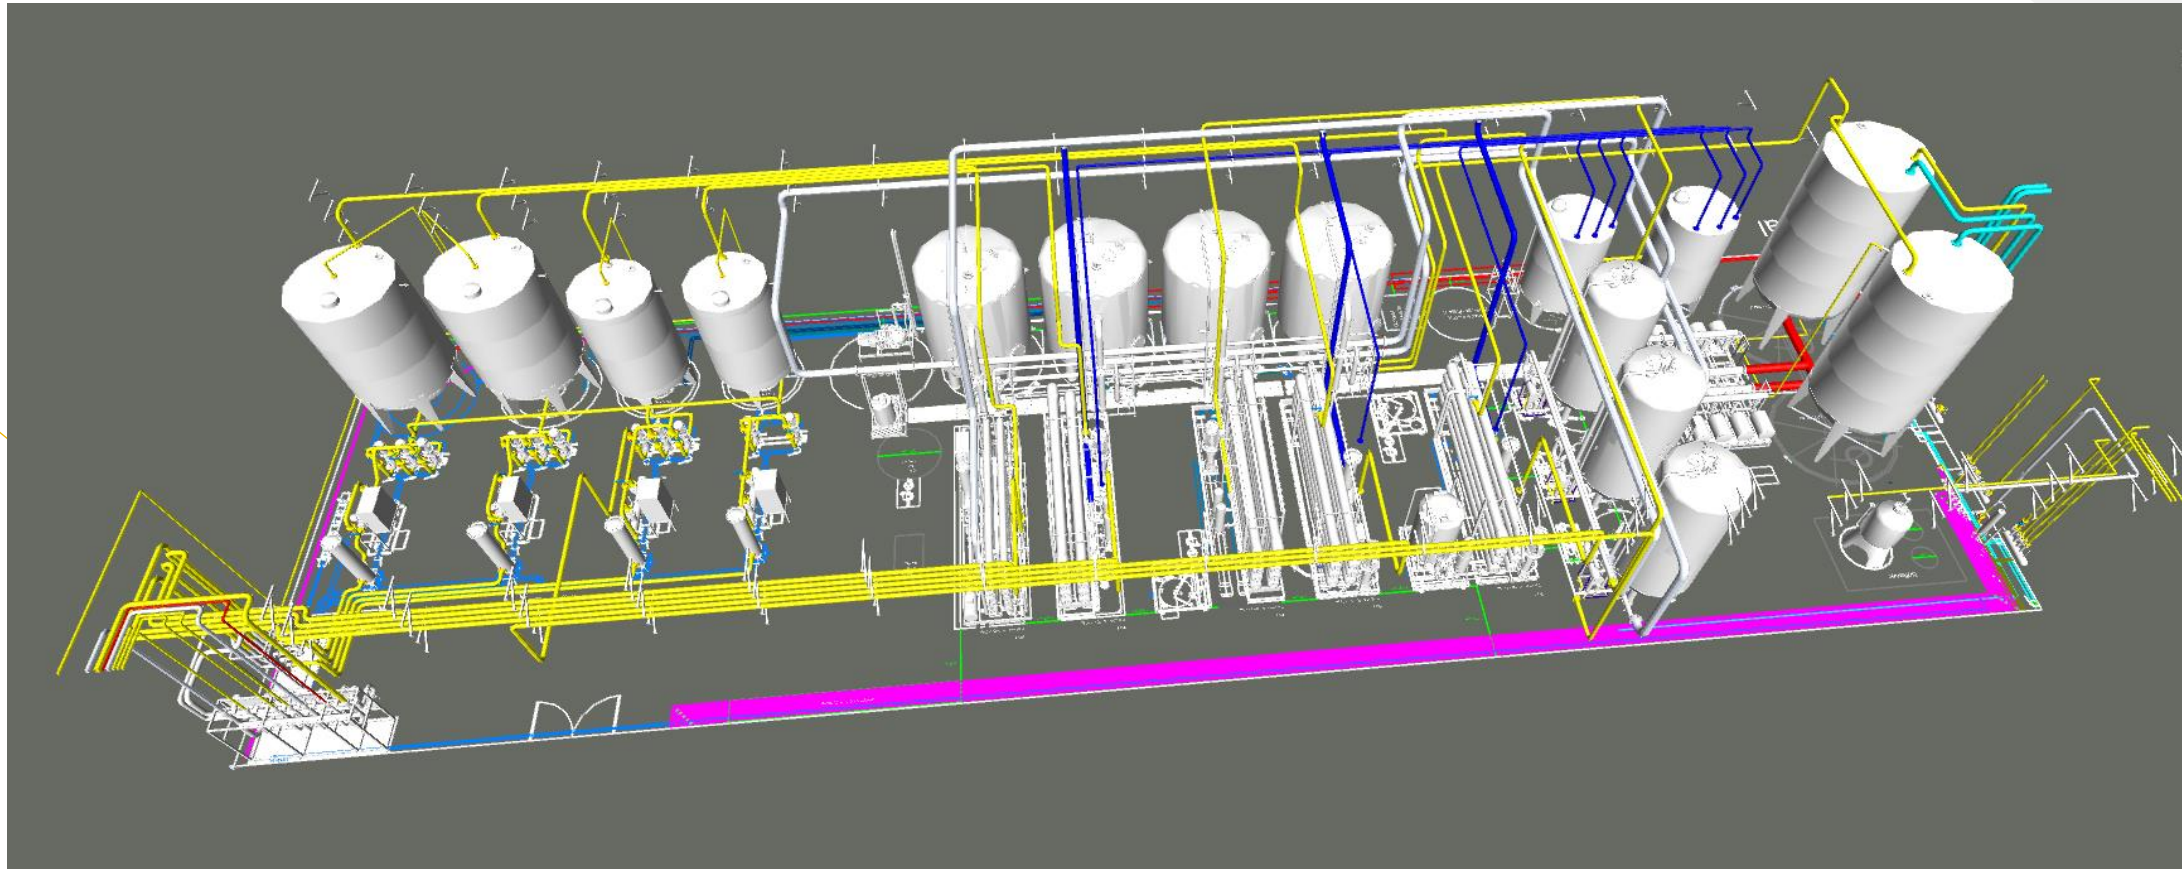

Success stories from our projects

Treated water distribution header for Coca Tanta

Success stories from our projects

Water treatment unit (Complete plant from CENTEC.de)

Success stories from our projects

Water treatment unit (Complete plant from CENTEC.de)

Success stories from our projects

Water treatment unit (Complete plant from CENTEC.de)

Thank You.
